February 2013

INTRODUCTION

This publication provides statistical information to planners, educators, and employers regarding high school graduates in Tennessee. The data in High School Graduates 2012 are presented in a county summary table followed by statewide totals. Individual county tables are presented alphabetically.

The Tennessee Department of Labor and Workforce Development, in cooperation with the Tennessee Department of Education, conducts a survey of all schools that have enrollment in grades 9-12 and qualify to give a state of Tennessee diploma upon graduation. This includes all public schools, accredited private schools, and special schools in the state. The following tables list the number of schools and response rates as well as the number of graduates, their education, and current work plans or military service, if appropriate.

Special thanks are extended to school administrators and counselors who took time to answer this survey. Their cooperation will benefit the educators, employers, and planners across the state who use this publication.

HIGHLIGHTS

Tennessee's 2011-2012 graduating class attended the state's 408 public and private high schools. There are 53 city high schools, 267 county high schools, 85 private high schools, and three state special schools that constitute the universe of this survey. The special high schools are for the vision and hearing impaired. This survey includes all accredited high schools that had students who qualified for a state of Tennessee diploma. Of the schools that responded to the survey, 72.1 percent of their graduates plan to continue their education.

Private schools graduated only 8.7 percent of all state graduates but 98.0 percent of these students plan to continue their education. City and county schools graduated the remaining 91.3 percent. Only 69.6 percent of these graduates plan to obtain additional education or training. The four largest urban counties (Davidson, Hamilton, Knox, and Shelby) accounted for 33.5 percent of all Tennessee graduates. Of the graduates in those four counties, 77.7 percent plan to continue their education. In the remaining 91 counties and the special schools, only 69.3 percent of the graduates plan on continuing their education. The survey response rate, in 2012, for these four urban counties was 78.2 percent. The response rate, in these same four counties, was 82.1 percent in 2011 and 85.7 percent in 2010. The response rate in the remaining 91 counties increased to 87.7 percent in 2012.

The highest percentage of graduates continuing their education occurred in Franklin County (100.0 percent), Fentress County (92.1 percent), Sevier County (89.2 percent), Williamson County (86.8 percent), Perry County (84.9 percent), and Weakley County (84.4 percent). These numbers are tempered by the fact that only the private schools in Franklin County responded to the survey while Fentress and Perry counties have only one high school in their county. The lowest percentage of graduates continuing their education occurred in Stewart County (26.6 percent), Campbell County (29.7 percent), Polk County (31.9 percent), Grundy County (32.7 percent), and Giles County (36.0 percent). In Campbell County the largest high school did not respond to the survey and may have skewed the results. This is the second consecutive year that Stewart and Giles counties had some of the lowest percentages of students continuing their education.

Bledsoe, Clay, Crockett, Hancock, and Trousdale counties had no responses to this survey. Before not responding this year Hancock County had the lowest percentage of their graduates continuing their education in the previous two years.

An 84.3 percent response rate (344 schools) was achieved in this year's high school survey. The high school universe increased by four schools from the previous year. The future plans of these students are not absolute measures; they represent the **intentions** of the 2011-2012 graduates. All data in this publication are **preliminary** accounts.

Graduates who did not fit into the categories of continuing their education, entering the labor force, or entering the armed forces were listed in the category of "other." All sub-categories may be greater than total graduates as some of the students fall into more than one category (i.e., continuing education and entering the labor force).

NA represents "not applicable" and is used when we did not receive any survey responses for a particular county. Schools that responded to the survey but had no graduates will have zeroes in the data column but will be counted as a responding institution.
